## Introduction

Thinking of setting up your own commercial distillery? Looking to add your own distilled spirit to your bar or events? Enrol on our Discover Distilling on line programme to gain insight into commercial distilling operations and how they can provide employment and profit.

Now upgraded to include production from raw materials including whisky our content will give you a sound overview of the techniques, the equipment needed and the operation of commercial distilling.

Drafted by our experienced distilling tutors the course includes on line tutorials with opportunity for question and answers and advice on your own ideas. Book now for full access or contact us below for further details and information on how our on line and on site tuition can help progress your ambitions.

Booking gives you a 10 % discount on the Start Up Distilling attendance course where you can experience practical demonstrations in production as well as detail on techniques and start up support.

## Objectives

At the end of the Discover Distilling programme you will have:

- Seen an overview of the distilling and rectification processes with an introduction to the concepts of distilling theory.
- Had opportunity to view and explore the parts of a still and their functions.
- Had opportunity to view the features of common rectification products – gin, vodka and rum and seen their recipe details.
- Seen presentations on small scale practical distilling.
- Had opportunity to read reports of commercial distilleries and case studies.
- Had opportunity to view cash flow examples of small-scale commercial distilling.
- Had opportunity to engage with tutors to discuss distilling concepts and practical examples.
- Obtained feedback on understanding from on-line activities and tutor engagement.
